Figures

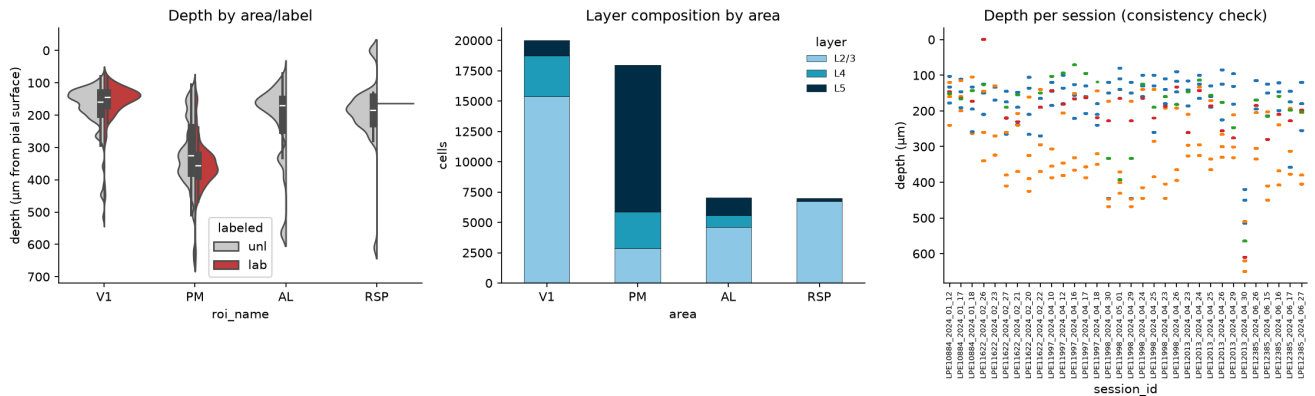

Cell counts

Cell counts -- DN

Depth laminar distribution

Depth / laminar distribution -- DN

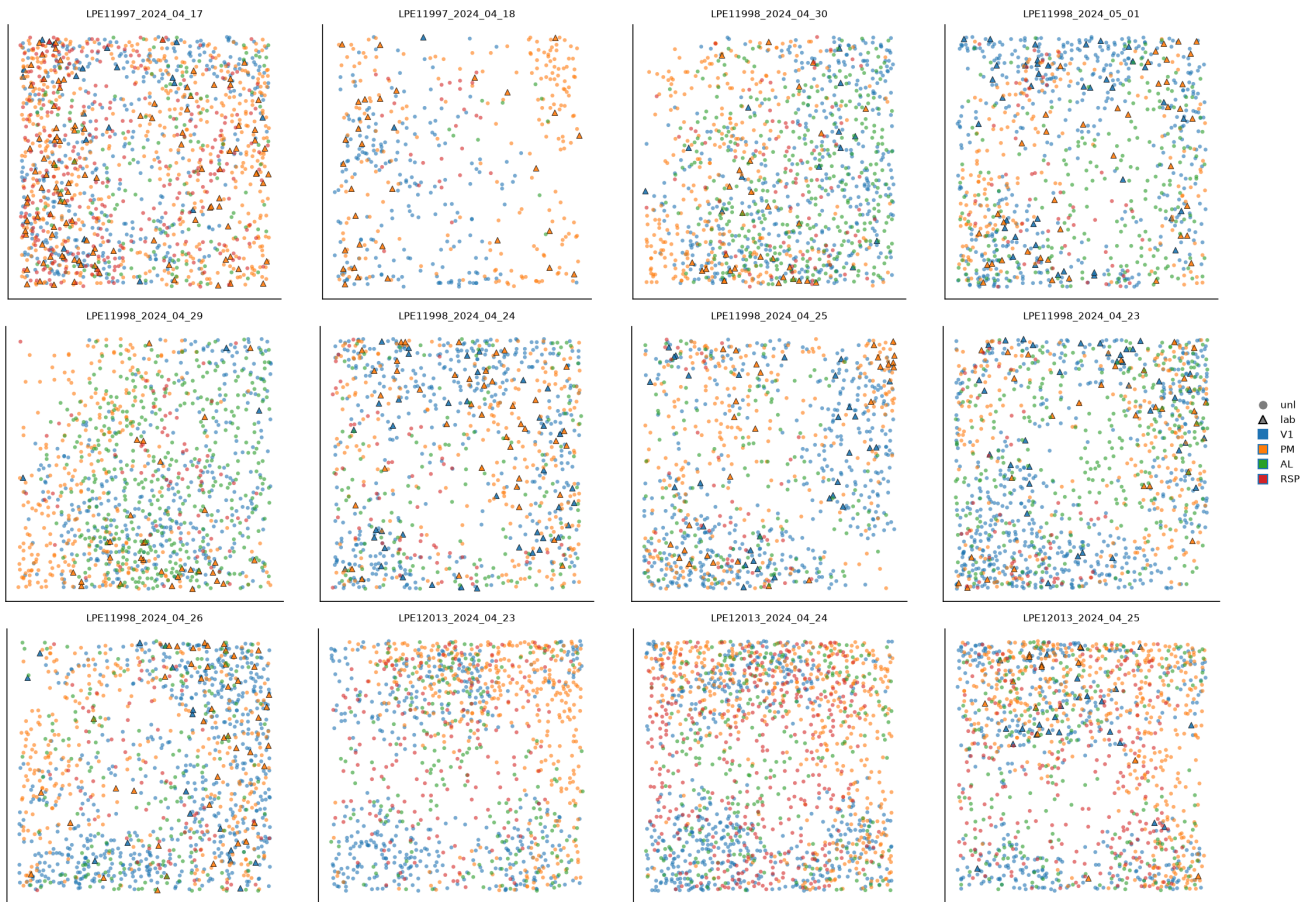

Xy positions page1

Cell positions per session (FOV-local coordinates, NOT aligned across sessions) -- page 1/3

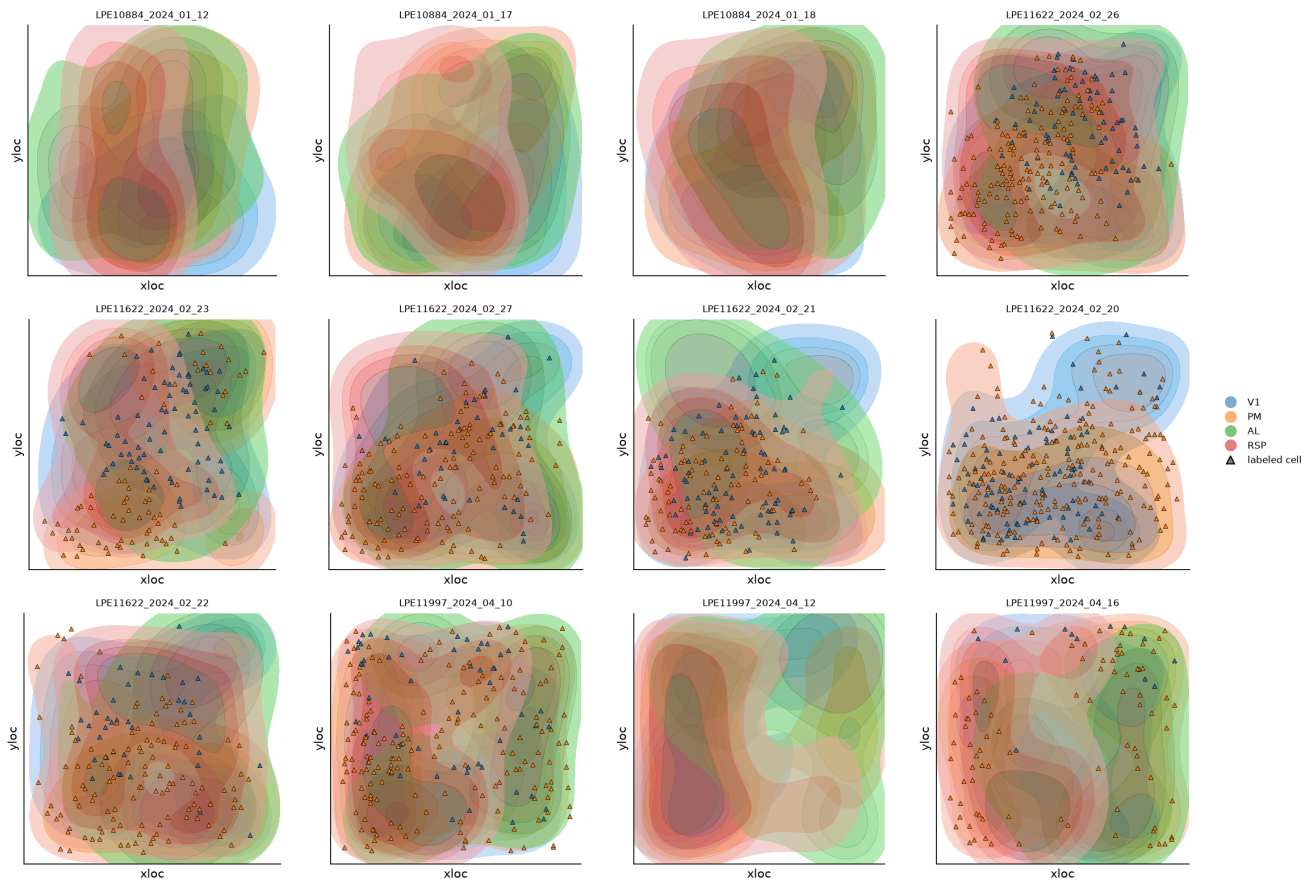

Xy positions page2

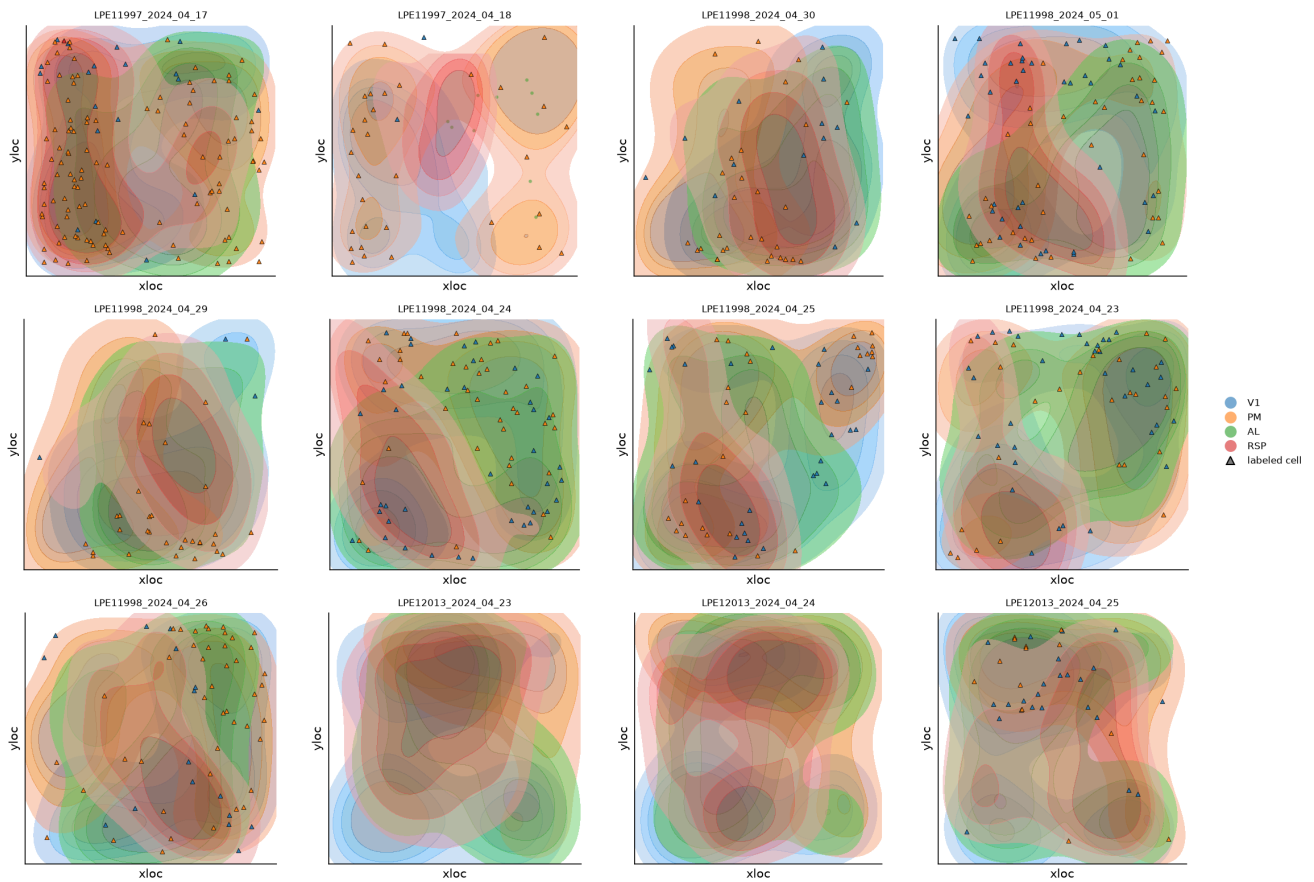

Xy positions page3

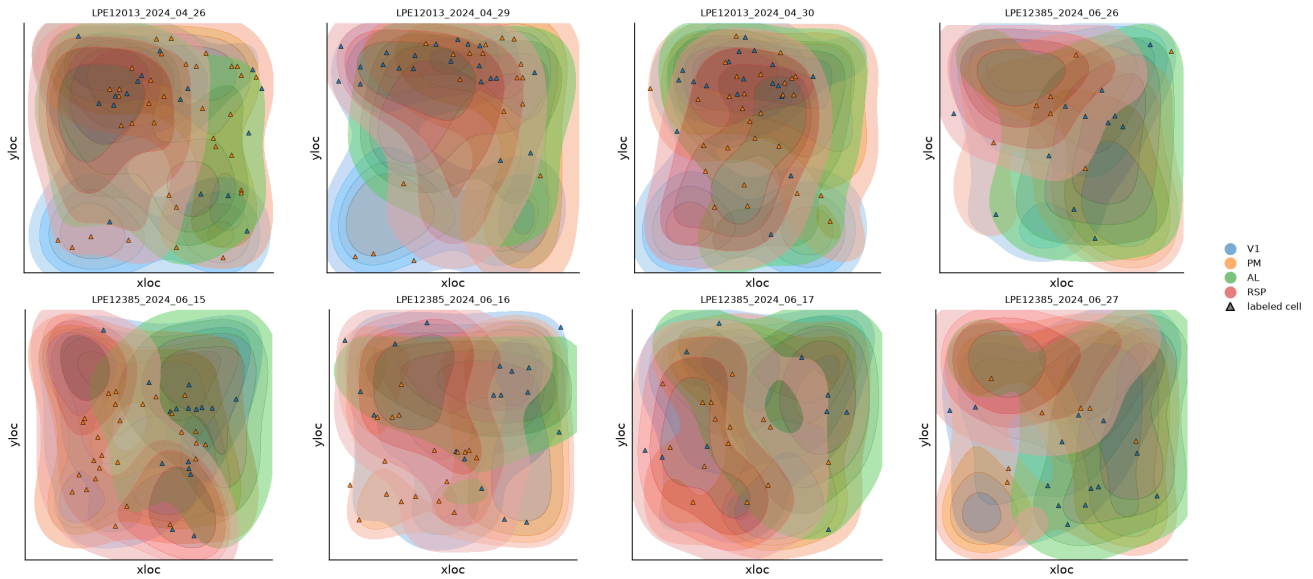

3b xy density page1

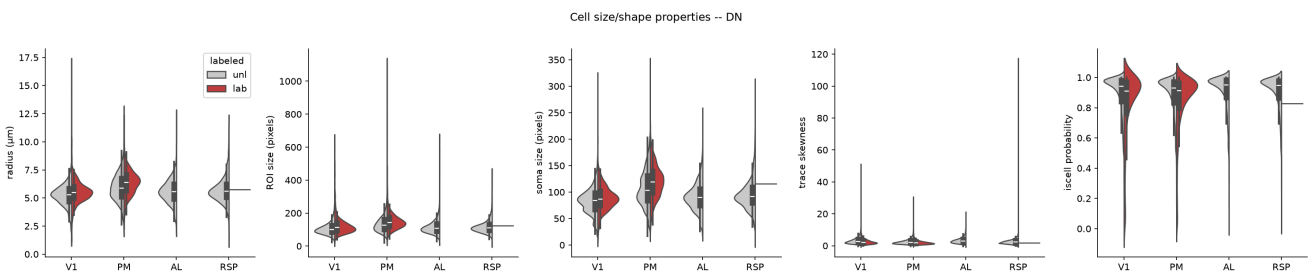

3b xy density page2

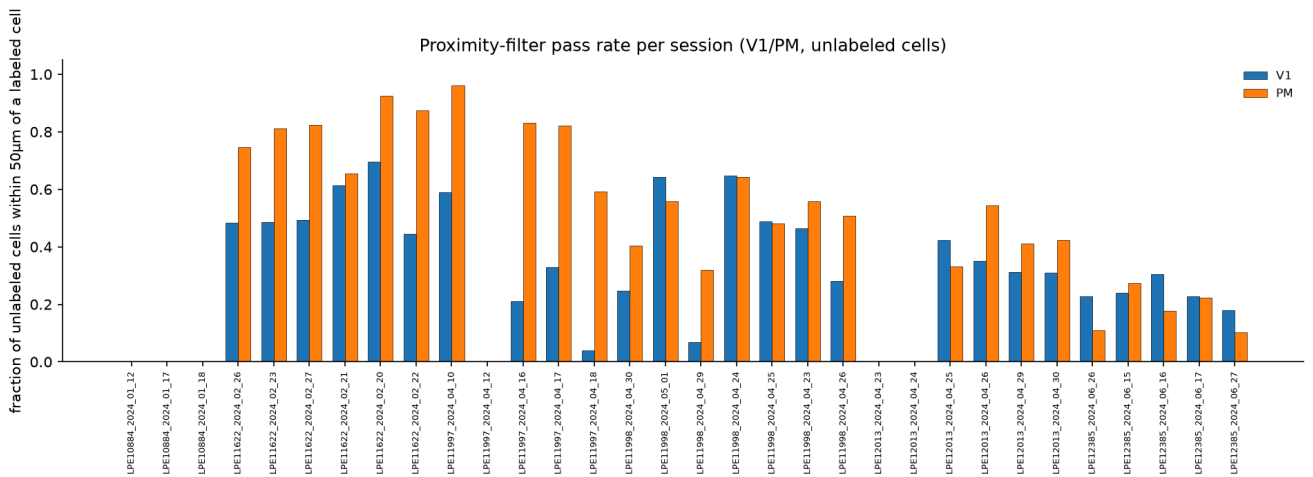

3b xy density page3

Cell size properties

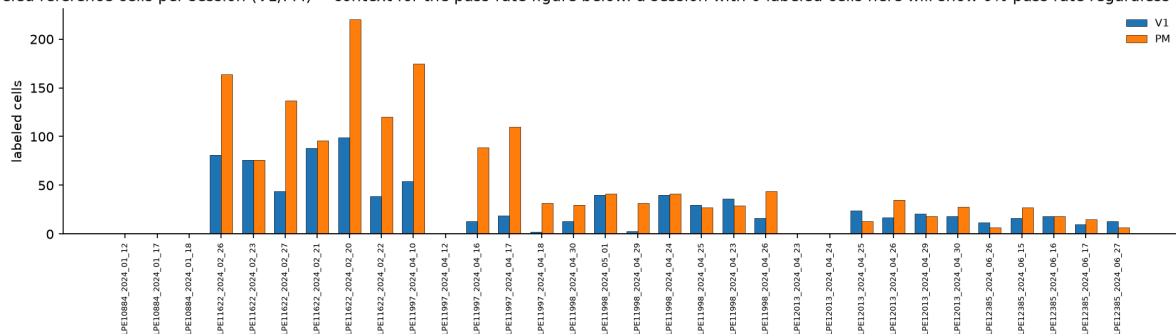

Proximity filter pass rate

5a labeled cells per session

Labeled reference cells per session (V1/PM) -- context for the pass-rate figure below: a session with 0 labeled cells here will show 0% pass rate regardless of geometry

5b distance to labeled distribution

How unlabeled V1/PM cells are actually distributed relative to the labeled population
(sessions with no labeled cells in an area are excluded here, not shown as 0)
